

A heatmap visualization of the channel state matrix. The x-axis is labeled "Channel State" and ranges from 0 to 7. The y-axis is unlabeled but ranges from 0 to 7. The color scale represents the magnitude of the channel state, with darker green indicating higher values and lighter green indicating lower values. The matrix shows a diagonal pattern of high values (darker green) and a block of low values (lighter green) in the bottom right corner.

Channel State	0	1	2	3	4	5	6	7
0	High	Medium	Medium	Medium	Medium	Medium	High	Medium
1	Medium	High	Medium	High	High	Medium	High	High
2	Medium	Medium	High	High	High	High	Medium	Medium
3	Medium	High	High	High	High	High	Medium	Medium
4	Medium	High	High	High	High	High	Medium	Medium
5	Medium	Medium	Medium	Medium	Medium	High	Medium	Medium
6	High	High	Medium	High	High	Medium	High	High
7	Medium	High	Medium	Medium	Medium	Medium	High	High

A heatmap showing the Average Action (Y-axis, 0.0 to 3.0) as a function of Channel State (X-axis, 0 to 7) and Battery Level (Z-axis, 0 to 5). The color scale ranges from 0.0 (light yellow) to 3.0 (dark purple). The heatmap shows that the Average Action is generally higher for higher Battery Levels and lower for higher Channel States. The highest values (around 3.0) are observed at Battery Level 4 and Channel State 0. The lowest values (around 0.0) are observed at Battery Level 0 and Channel State 7.
